

DENTAL MILLING

**WE'VE GOT
YOUR BACK**

DEPRAG

D52 Milling Machine

The 5-axis milling machine for dry machining.

Ball screw rod
Smooth movement, precise positioning.

One-piece cast aluminum structure.

Servo motor
Highly precise position control.

Remote monitoring system.

Loniser module

Automatic calibration.

Powerful Spindle

1.8KW
62mm
60000 RPM

Water cooling

Automatic changing tools module

10 tools
Tool lifetime monitoring system.

Applications

Crown/Bridge

Inlays/Onlays

Abutments

Veneer

Denture

Occlusal splint

Screw-retained bridge

Surgical guide

Model cast

Holder Types

Half-open blank holder (C-CLAMP)

- Standard
- Suitable for processing $\Phi 98$ mm zirconia discs, resin discs, titanium discs, etc
- Enables 5-axis milling up to 90 degrees axis adjustment (+30°, -90°)
- Maximum material thickness 35mm

Block holder

- Standard
- 6 positions, suitable for zirconia and PMMA block
- 18*13*15/20*15*14/20*15*19/40*15*14/40*15*19/55*15.5*19 available

Materials

Zirconia

PMMA

PEEK

Wax
